

SCHLEPPFIX *simply better*

SLURRY SPREADER TRACTOR ATTACHMENT

The innovative, emission-reducing
slurry application system
for future-oriented agriculture

Swiss patent CH716757 | European patent EP3959956

no run-off hoses

no rotating distributor head

low wear

significant fuel savings

working widths 7.5 m - 9 m

 **SWISSTEC AG**
SPEZIALMASCHINENBAU

Schleppfix SVA

for use with hoses

Characteristics

- ✓ Clean and precise depositing in the crop due to shoe system
- ✓ **Tare weight** of the applicator when spreading slurry **on the ground** (low front axle load reduction)
- ✓ Very simple, **solid hydraulic system**: only one double-acting control valve (no floating position) required, **no electric valves**, etc.
- ✓ Low demands on the tractor hydraulics
- ✓ Spread rate individually **adjustable** to **pump capacity** (no twisting of hoses)
- ✓ **Optimal** weight displacement in **transport position**
- ✓ Outriggers with **additional linkage joint** can swivel **320°** to reduce drag when turning

SAVE MONEY WHEN SPREADING SLURRY SIMPLE | EFFICIENT | INEXPENSIVE

100% LESS FUEL CONSUMPTION
68% LESS MAINTENANCE COSTS
72% LESS SPREADING TIME
63% LESS CLEANING TIME

**76% INCREASE IN EFFICIENCY
THANKS TO SCHLEPPFIX**

Technical details

Schleppfix SVA

SCHLEPPFIX

Distribution plate

Patented distribution plate made from wearproof plastic, variably adjustable cross-section due to range of inlet nozzles, high spread rate also with vacuum compressor. Service cover with quick-release locks for cleaning purposes and removal of foreign bodies.

Volume flow meter option

For checking and determining the exact spread rate

Slurry supply outriggers

For draining off the dried residue in the hose on start-up

Simple attachment system

Take-up via cat. II 3-point hydraulics with balancing function

Oscillation compensation

Hilly terrain can be mastered by means of spring-centred compensation

Option **ROTAFIX**

Axial pivot joint to stop the hoses twisting

Distribution boxes

Made entirely of stainless material (chromium steel), long service life and low maintenance costs

Deflector

Can simply be folded up for cleaning without using tools

Slurry supply outriggers

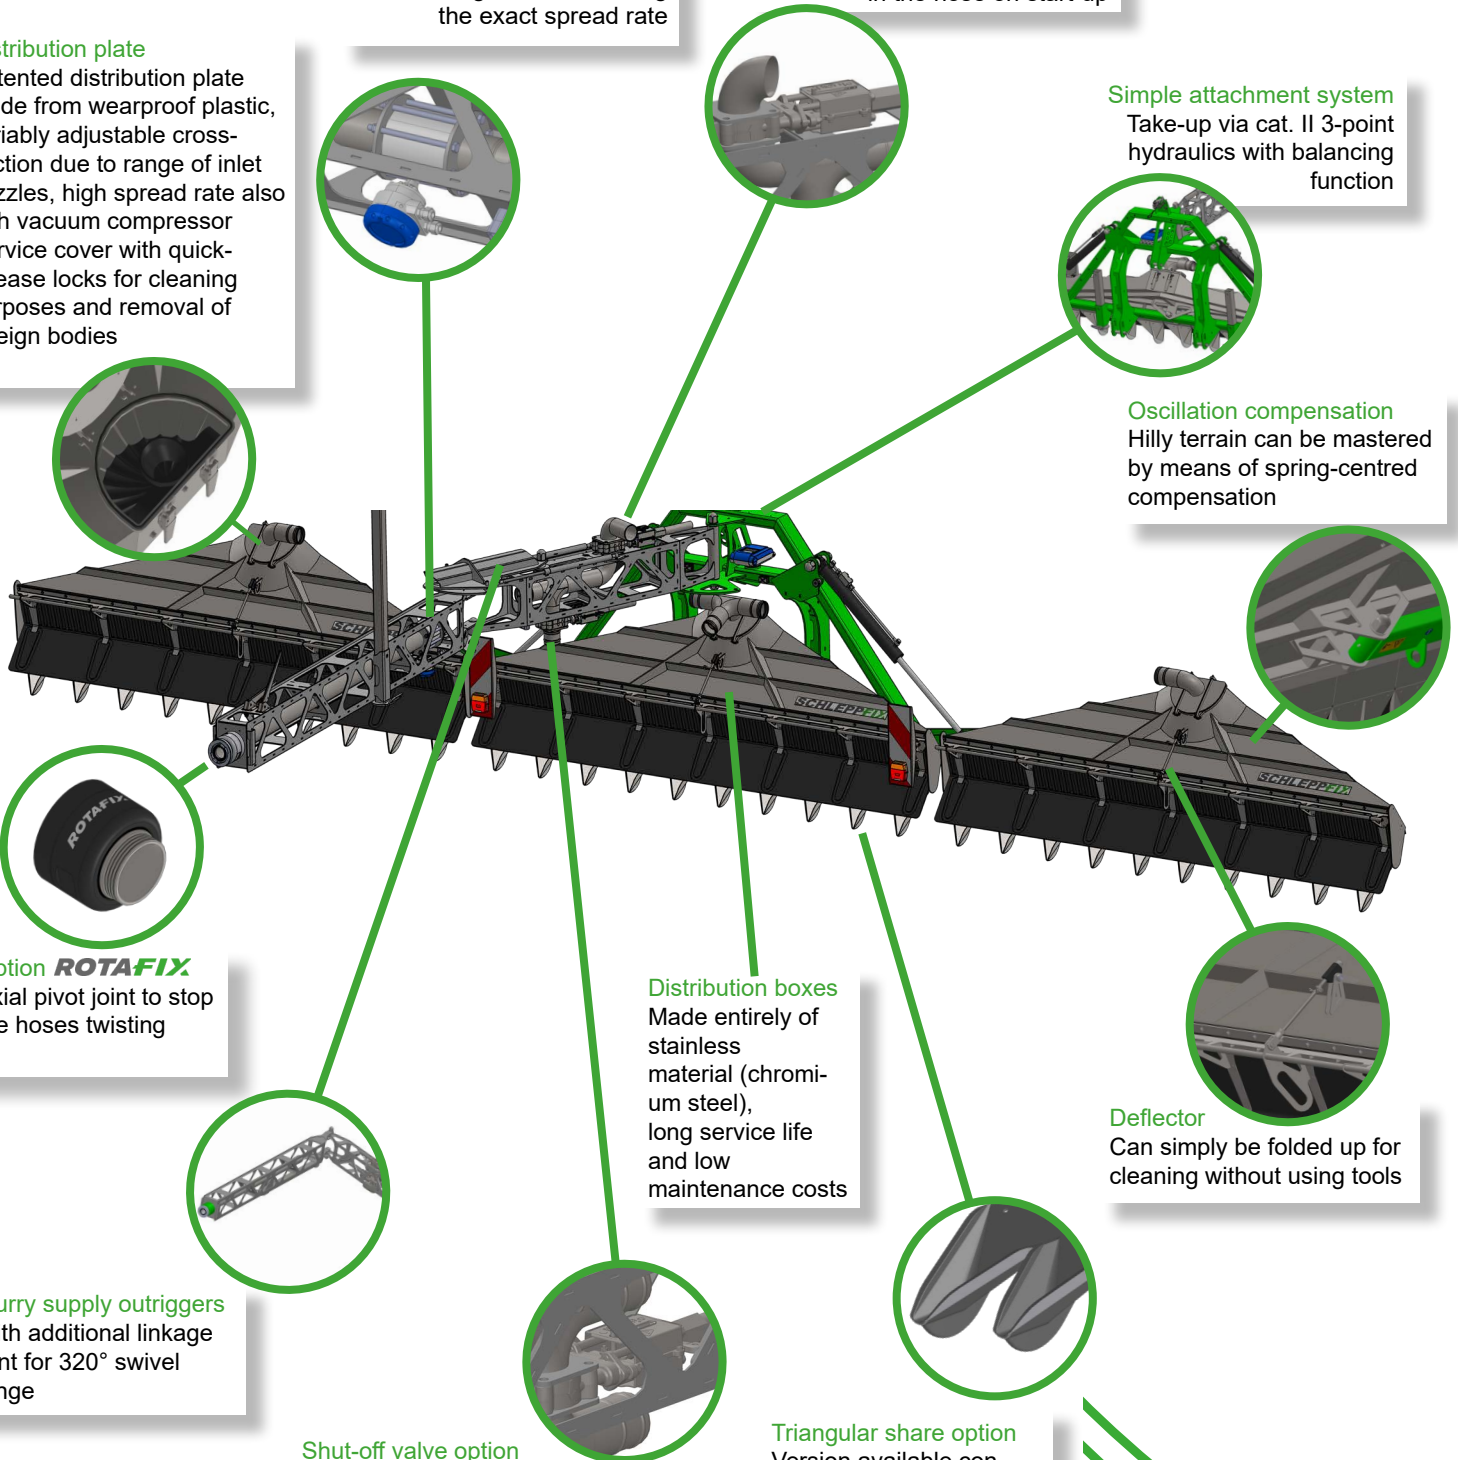

With additional linkage joint for 320° swivel range

Shut-off valve option

Slide valve for shutting off the slurry supply

Triangular share option

Version available consisting of HARDOX with 30 cm or **DUOFIX**-double shoe with 15 cm spacing in wear-resistant plastic

Technical Data

Schleppfix Type SVA 7 SVA 9

Working width in meters	7.5	9.0
Number of outlets	24 / 48 ¹	30 / 60 ¹
Weight without attachment	690 kg	790 kg
Number of hydraulic valves with SA	1x DW ²	1x DW ²
Ø nozzle cross-section in mm	47 - 87	47 - 87
Attachment option	Tractor	Tractor
INOX trailing shoe 30 cm	●	●
HARDOX trailing shoe 30 cm	●	●
DUOFIX trailing shoe 15 cm	●	●
LED lighting	●	●
Electric safety valve	●	●
Start-up drain valve 1x DA ²	●	●
Supply shut-off valve 1x DA ²	●	●
Axial pivot joint Rotafix	●	●
Flow meter	●	●
Boom brake	●	●

PIVOT JOINT

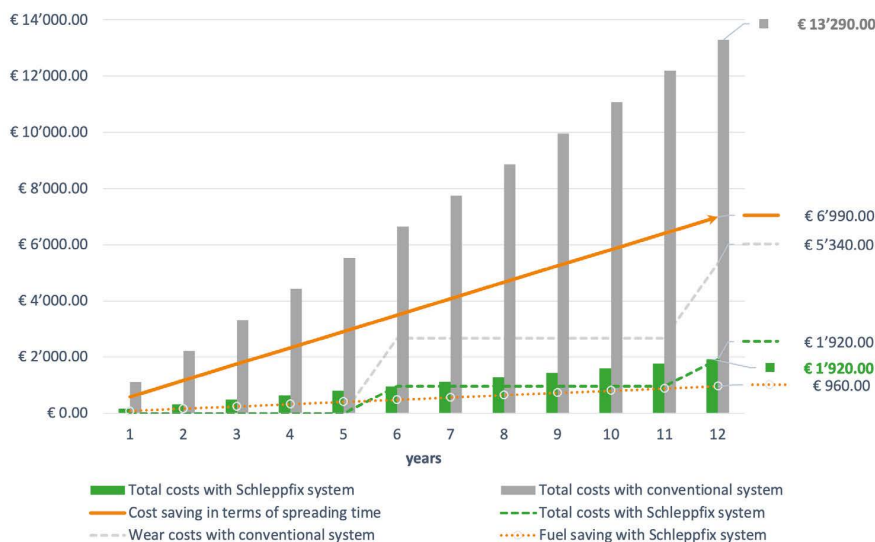

ROTARY TRANSMISSION EASY | STABLE | CONSISTENT

- AXIAL ROLLER BEARINGS FOR HIGH PULLING FORCES
- SLIDE BEARINGS FOR RADIAL TENSILE FORCES
- BSP THREAD/FLANGE CONNECTION
- LIGHTWEIGHT AND COMPACT DESIGN
- STAINLESS STEEL INNER TUBE
- SIZES 3"/4"/5"

¹ for Duofix triangular share option ² DA (Double-acting valve) ● series ● optional

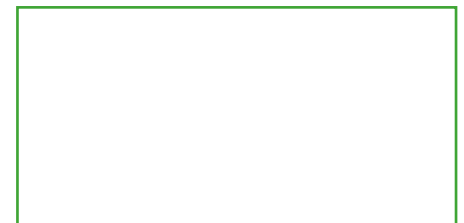

Cost saving with Schleppfix compared to conventional systems
